## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 2. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Ollikainen (U.S. Pub No. 2003/0074475A1).
- 3. As per claims 1, 6 & 11 Ollikainen disclosed a wireless communication system capable of providing viewable segments of a mark-up language file located on a network, comprising: a wireless communication device in communication with a proxy server, and a remote server connected to said proxy server including said mark-up language file (paragraph.70); wherein said proxy server is programmed to receive a request to retrieve a predetermined mark-up language file from said wireless communication device, said request being in a first format that is converted into a second format by the proxy server, wherein said second format is used to retrieve said mark-up language file from said remote server (paragraphs. 45 & 46), wherein said proxy server separates said retrieved mark-up language file into a plurality of viewable segments and transmits a first viewable segment to said wireless communication device (paragraphs.49, 54, 58 & 59).

Application/Control Number: 10/071,936

Art Unit: 2143

4. As per claim 2 Ollikainen disclosed the wireless communication system of claim 1, wherein said proxy server is programmed to separate said mark-up language file into a plurality of viewable segments, provided said mark-up language file is larger than a display buffer located on said wireless communication device (paragraph.26, 27 & 70).

Page 3

- 5. As per claims 3 & 7 Ollikainen disclosed the wireless communication system of claim 1, wherein said proxy server is further programmed to receive a request from said wireless communication device to retrieve a second viewable segment of said mark-up language file and to transmit the requested viewable segment to said wireless communication device (paragraphs.49, 54-59 & 70).
- 6. As per claims 4, 10 & 12 Ollikainen disclosed the wireless communication system of claim 1, wherein said proxy server converts said viewable segments into a format compatible with said wireless communication device (paragraphs. 72-74).
- 7. As per claims 5 & 13 Ollikainen disclosed the wireless communication system of claim 1, wherein said viewable segments are sized according to a display buffer of the wireless communication device (paragraphs.26, 27 & 54-59).
- 8. As per claim 8 Ollikainen disclosed the method of claim 6, further comprising the step of generating at least one scrolling icon on a display of said wireless communication device when said viewable segments of said markup language file are displayed in said display (paragraph.54).

Art Unit: 2143

9. As per claim 9 Ollikainen disclosed the method of claim 6, further comprising the step of transmitting another viewable segment to said wireless communication device in response to the selection of said at least one scrolling icon (paragraphs.26, 27 & 54-59).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asghar Bilgrami whose telephone number is 571-272-3907. The examiner can normally be reached on M-F, 8:00-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
